July 2007

CARAT  Highland  NorStone 

Inovadis is a french design and development company that aims at offering Hi-fi and Home Theatre products that combine a modern and functional design, excellent performance and the best value for money.

Inovadis already owns 4 brands: Carat electronics, Highland Audio loudspeakers Norstone AV furniture and AV accessories and Lumene projection screens.

INOVADIS will exhibit at the coming IFA in Berlin:

**Messe Berlin – Germany
August 31st – September 5th 2007
Carat, Highland Audio, NorStone and Lumene
Hall 3.2
Booth number 117**

This year, IFA will particularly focus on Sound, Music, High Fidelity and High End... This is surely the perfect date and place for Inovadis to introduce impressive novelties.

Inovadis has built, over the last years, its reputation on products that combine high end performances and relatively affordable price tags. Although the French manufacturer guideline remains the democratisation of the High End products, Highland Audio, Carat, NorStone and Lumene will introduce in 2007 High End and top of their respective range products.

Inovadis will exhibit all the products that will be available for the Christmas Season and will also disclose to VIPs its latest R&D prototypes.

Do not miss this wonderful opportunity to discover impressive products and come to visit Inovadis Booth at IFA 2007.

Inovadis commercial and R&D teams will welcome you in their VIP showroom, where new products and prototypes will be on display.

We hope for your visit and wish you sunny and relaxing Summer Holidays
